

Rubens Place School Readiness Group Open Day

- * Do you have a child with autism who will be starting school in the next 12—18 months?
- * Do you want your child to attend a specialised service that will help to provide them with the necessary skills to successfully transition to a school placement
- * A service that will address the specific needs of a child with Autism
- * A service that will nurture your child and work on developing their level of independence
- * A service that will provide the additional support your child needs to shine.

If you answered **YES** to the above, then you should consider attending the information session for placement in either the school readiness group or school enrolment.

Rubens Place is part of Woodbury, the only school in NSW to provide education for children with Autism using Applied Behaviour Analysis (ABA) as its teaching methodology.

Our individualised programs focus on all areas of a child's development, and address areas such as language, communication, behaviour, self help and play skills. We teach children with Autism to learn to learn in a group.

The school readiness program provides intensive group instruction tailored to your child's individual needs to successfully transition to a school environment.

Our information session will provide you with invaluable information on the specialised education program we provide for your child.

This information session is for parents/carers only and children are not permitted to attend. If after attending you wish to apply for placement, a formal intake assessment will apply.

*** Light refreshments will be available.*

We do hope you can join us.
